MAINTENANCE REQUEST

Reporting Date	June 15
Department	Treasury & Incriminating Evidence Storage
Location	Secret Volcano Lair, Vault Level 4
Project Manager	Baron Von Dark
Prepared By	Minion #42

SUMMARY

During routine gold bar stacking operations, it was discovered that Vault Door #4 malfunctioning. The issue first presented when the door failed to respond to the standard code. Subsequent attempts to open the door using the backup phrases 'Alakazam' and 'Open Sesame' also proved unsuccessful.

ISSUE	IMPACT	URGENCY LEVEL
Non-Responsive Keypad: The keypad emits a mocking sound when any code is entered, suggesting a possible software glitch or malevolent possession.	Minion Morale: The door's security lasers have started activating randomly, singeing several minion uniforms and causing minor hair loss.	Priority: Urgent (Before another minion gets barbecued)

OFFICIAL USE ONLY

*Door remains stubbornly sealed, mocking our efforts.
 Open Sesame command met with derisive sound from the keypad.
 Repeated manual override attempts resulted in singed minion uniforms.
 Technician attempted a hard reset, only to be chased by rogue lasers.
 Yielding no progress, we bribed the door with shiny trinkets, to no avail.*

*Temporary measures include posting Minion #66 as a full-time guard.
 We suggest a full reset or advanced tech support intervention.
 Our accountant now advocates for a vault-free financial strategy.*
